Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritising volume over value, out-of-the-box ideas are welcomed and built upon, and all participants collaborate to develop a rich set of creative solutions.

For the Automated Network Request Management in ServiceNow project, the team used this exercise to move from the problem statements to a concrete, prioritised set of automation ideas for the ServiceNow implementation.

Step 1: Team Gathering, Collaboration and Idea Generation
